Subjects

Adrenergic beta antagonists
Switching to once-daily evidence-based β-blockers in patients with systolic heart failure or left ventricular dysfunction after myocardial infarction [Albert] Dec:62

Advance directives
Advance directives: results of a community education symposium [Later] Dec:31

Blood transfusion reaction
Promoting recognition and prevention of transfusion-related acute lung injury [Kleinman] Aug:49

Brain injuries
Sympathetic storming after severe traumatic brain injury [Lemke] Feb:30

Bronchiolitis
Bronchiolitis obliterans organizing pneumonia [White] Jun:53

Cacao
The truth is often bittersweet... chocolate does a heart good [Alspach] Feb:11

Cancer patients
Caring for lung cancer patients receiving photodynamic therapy [Smith Collins] Apr:53

Cardiomyopathy, hypertrophic
Transient left ventricular apical ballooning [McCulloch] Dec:20

Catheter-related infections
Central catheter infections: use of a multidisciplinary team to find simple solutions [Racco] Feb:80

Central venous catheters
Practical aspects of continuous intravenous treprostinil therapy [Widlitz] Apr:41

Continuous renal replacement therapy
Continuous renal replacement therapy in the adult intensive care unit: history and current trends [Dirkes] Apr:61

Critical care nursing
Critical care nurses' work environments: value of excellence in Beacon units and Magnet organizations [Ulrich] Jun:68
Ventilator-associated pneumonia: risk factors and prevention [Augustyn] Aug:32
For our adult critical care unit, change was good [Durham] Oct:84
Designing a comprehensive model for critical care orientation [Morris] Dec:37

Dermatitis
Perineal dermatitis in critical care patients [Driver] Aug:42

Diagnostic imaging
Transesophageal imaging and interventions: nursing implications [Marchiondo] Apr:25

Echocardiography, transesophageal
Transesophageal imaging and interventions: nursing implications [Marchiondo] Apr:25

Education, nonprofessional
Advance directives: results of a community education symposium [Later] Dec:31

Electrocardiography
Electrocardiography course revisions improve students' test scores [Barringer] Jun:88

Emergency nursing
Rapid response team: challenges, solutions, benefits [Thomas] Feb:20

Enteral feeding
Development of evidence-based guidelines and critical care nurses' knowledge of enteral feeding [Bourgault] Aug:17

Family support
Impact of a multifaceted intervention on nurses' and physicians' attitudes and behaviors toward family presence during resuscitation [Mian] Feb:52

Heart arrest
Induced hypothermia for patients with cardiac arrest: role of a clinical nurse specialist [Kozik] Oct:36

Heart failure, congestive
Switching to once-daily evidence-based β-blockers in patients with systolic heart failure or left ventricular dysfunction after myocardial infarction [Albert] Dec:62

Hypertension, pulmonary
Practical aspects of continuous intravenous treprostinil therapy [Widlitz] Apr:41

Hypothermia, induced
Induced hypothermia for patients with cardiac arrest: role of a clinical nurse specialist [Kozik] Oct:36

Intensive care units
Continuous renal replacement therapy in the adult intensive care unit: history and current trends [Dirkes] Apr:61
Unreported errors in the intensive care unit: a case study of the way we work [Henneman] Oct:27
Reliability of height and weight estimates in patients acutely admitted to intensive care units [Determann] Oct:48

Lung diseases, interstitial
Bronchiolitis obliterans organizing pneumonia [White] Jun:53

Measurement issues and assessment
Reliability of height and weight estimates in patients acutely admitted to intensive care units [Determann] Oct:48

Myocardial infarction
Transient left ventricular apical ballooning [McCulloch] Dec:20

New graduates
Meeting the needs of graduate nurses in critical care orientation: staged orientation program in surgical intensive care [Maule Chesnutt] Jun:36

Nurses as patients
Monitoring the health of critical care nurses: are you up to the challenge? [Alspach] Aug:10

Orientation
Meeting the needs of graduate nurses in critical care orientation: staged orientation program in surgical intensive care [Maule Chesnutt] Jun:36
Designing a comprehensive model for critical care orientation [Morris] Dec:37

Patient safety
Unreported errors in the intensive care unit: a case study of the way we work [Henneman] Oct:27

Perineal care
Perineal dermatitis in critical care patients [Driver] Aug:42

Personnel retention
Retaining experienced critical care nurses: what matters most... to you? [Alspach] Apr:8
Facilitating the retention of experienced critical care nurses: a survey report on what matters most [Alspach] Oct:12

Photodynamic therapy
Caring for lung cancer patients receiving photodynamic therapy [Smith Collins] Apr:53

Physical therapy assistants
Introducing a vital new member to the critical care team: our physical therapy assistant [Conti] Aug:68

Pneumonia, ventilator-associated
Ventilator-associated pneumonia: risk factors and prevention [Augustyn] Aug:32

Pulmonary embolism
Massive pulmonary embolism [Shaughnessy] Feb:39

Resuscitation
Impact of a multifaceted intervention on nurses' and physicians' attitudes and behaviors toward family presence during resuscitation [Mian] Feb:52

Students, nursing
Electrocardiography course revisions improve students' test scores [Barringer] Jun:88

Sympathetic nervous system
Sympathetic storming after severe traumatic brain injury [Lemke] Feb:30

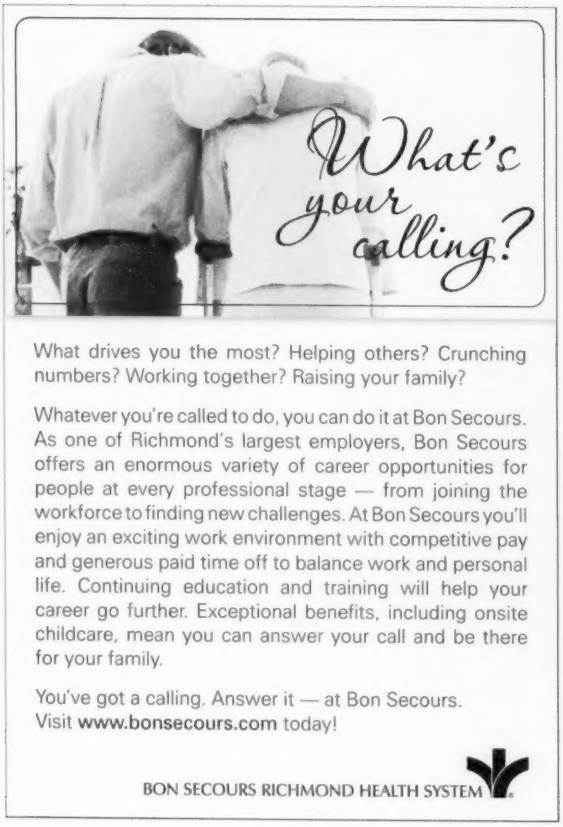
Syncope, vasovagal
Massive pulmonary embolism [Shaughnessy] Feb:39

Synergy model
Fostering synergy: a nurse-managed remote telemetry model [Reilly] Jun:22

Team nursing
Rapid response team: challenges, solutions, benefits [Thomas] Feb:20
Central catheter infections: use of a multidisciplinary team to find simple solutions [Racco] Feb:80
Introducing a vital new member to the critical care team: our physical therapy assistant [Conti] Aug:68
There is no I in team [Kiem] Dec:88

Telemetry
Fostering synergy: a nurse-managed remote telemetry model [Reilly] Jun:22

Work environment
Critical care nurses as coworkers: are our interactions nice or nasty? [Alspach] Jun:10
Critical care nurses' work environments: value of excellence in Beacon units and Magnet organizations [Ulrich] Jun:68



What drives you the most? Helping others? Crunching numbers? Working together? Raising your family?

Whatever you're called to do, you can do it at Bon Secours. As one of Richmond's largest employers, Bon Secours offers an enormous variety of career opportunities for people at every professional stage — from joining the workforce to finding new challenges. At Bon Secours you'll enjoy an exciting work environment with competitive pay and generous paid time off to balance work and personal life. Continuing education and training will help your career go further. Exceptional benefits, including onsite childcare, mean you can answer your call and be there for your family.

You've got a calling. Answer it — at Bon Secours.
